

Super Star SORGHUM

SEED

PANICLE*

LEAVES

STALK

ROOTS

*The panicle is a group of flowers on the sorghum stem which fill with small, round seeds.

All About Sorghum

It's called Nature's Super Grain™

Contains protein, iron, zinc, fiber, niacin, thiamin, vitamin B6, copper, magnesium, phosphorus, selenium and manganese.

Naturally gluten-free.

The grain can be cooked whole, ground into flour, or popped like popcorn.

Also good for animal feed, fuel, pet food, sweet syrup, crafting materials and much more!

Good for the environment because it enriches the soil, uses very little water and creates wildlife habitat.
